

RST's Casagrande Type Standpipe Piezometer tip consists of a slotted PVC body enclosing and protecting a porous plastic filter element. A CPVC body is available for leachate extraction.

For measurement of water pressures in ground where the time lag and high displacement requirements inherent in standpipes are not crucial, and where the presence of standpipes will not hinder construction. A bubbler system may be incorporated to allow remote reading, Bourdon tube gauges may be attached to monitor artesian pressures.

Drive-in models and custom sizes are also available, contact RST Instruments for more details.

FEATURES

The flush body design, permits a 33% larger filter area than 3/4 in. externally coupled instruments, while maintaining the same outside diameter.

A unique two step internal bushing, will accept either 1/2 in. or 3/4 in. riser pipes while the body will accept a 1 in. coupling. The same tip, therefore, will fit all three common sizes of risers.

The large number of uniform pores permits high permeability in a short length.

Smooth and protected filter element resists clogging.

Uniform 70 micron porosity.

May be cleaned by back flushing.

Excellent chemical resistance.

Low cost, with same day delivery.

FUNCTIONS

Monitoring of pore pressures in dams and embankments.

Slope stability investigation and leachate extraction.

Groundwater sampling, monitoring, ewatering and drainage operations.

SPECIFICATIONS

Maximum O.D.	1.32 in. (3.35 cm)
Length	14 in. (35.6 cm)
Filter Area	37.69 sq. in. (243 sq. cm)
Body Material	1 in. PVC
Pore Diameter	70 micron
Permeability	3×10^{-4} m/s (low air entry)

Accepts 1 in., 3/4 in. and 1/2 in. PVC solvent weld riser pipe.
Non standard types of riser fittings may be provided on request.
Please contact us regarding price and delivery information.

ORDERING INFORMATION

5.24 cm (6")	PP0306
30.48 cm (12")	PP0312
45.72 cm (18")	PP0318
60.96 cm (24")	PP0324

Custom sizes and options are available, contact RST Instruments for more details.

ANCILLARY EQUIPMENT (Specify when ordering)

1, 3/4, or 1/2 in. riser pipe

Bentonite pellets

Protective enclosures

Bubbler readout systems

Water level meter
